Project Details

Environmental Strategy
Outline the Company's current environmental strategy and how this project aligns with the Company's environmental/energy management plan. What, if any, key actions have the Company taken to date to reduce energy usage and GHG emissions? What are the site objectives/commitments? (e.g. align to ISO 50001, ISO 14001, SBTi)

Consumption Monitoring
How is energy consumption being monitored currently? (What, if any, system is in place?)

Metering Plan Details
Provide details on the following; what is going to be measured (i.e., steam, electricity, gas, Low pressure hot water, compressed air etc), what type of meter is going to be installed (i.e., turbine meter, positive displacement meter etc), what is it's expected accuracy, will the meter be connected to a data collection system, what will the meter be used for in the long term for ongoing performance monitoring and at what frequency? **(Note: Developing a metering plan is an eligible activity under GreenStart)**

Carbon Footprint of your Organisation	
What is the Carbon Footprint of your Organisation (Tonnes CO2):	
Select calendar year of footprint (e.g. 20XX)	
Specify Carbon Calculator/Standard:	
If other please specify	
The carbon calculator provided as part of the Government [Climate Toolkit 4 Business] is designed to give a simple and easy-to-use carbon assessment for most businesses. To calculate your carbon footprint, you will need your energy, water and waste bills and company travel or freight data. This calculator provides an estimation only but gives a good initial understanding of where emissions arise in your business operations. If using a carbon calculator/standard other than the Climate Toolkit 4 Business include Scope 1 and Scope 2 emissions only, exclude Scope 3. Note: Scope 1 are direct emissions within the company e.g. fuel combustion, company vehicles. Scope 2 are indirect emissions e.g. purchased electricity. Scope 3 are indirect emissions in the upstream and downstream supply chain e.g. purchased goods & services, waste disposal, use of sold products, transportation & distribution.	

Utility Costs:
Provide utility costs associated with each stream. i.e. how much electricity, gas, oil etc being used

Company's Current and Projected Trading and Employment Position

Equipment

Notes:
• Eligible costs are the hardware costs for equipment for a new metering system (e.g., energy, gas, diesel, oil, water, steam meters and loggers) and reasonable installation and commissioning costs • Ineligible costs are the software platform costs, specifically for subscription and on-going support and maintenance costs. • The grant claim is based on the costs of equipment excluding VAT. If any expenditure is incurred before the date of application, the entire project will be ineligible for support • Copies of quotations or tenders showing the description and cost will be required when completing your claim. As per Enterprise Ireland's Special Conditions related to this grant, applicants are to obtain one written quote for grant aided capital metering equipment for energy use or consumption monitoring and tracking where the cost is up to €4,999, and for a cost in excess of that figure, three competitive quotations or tenders (where applicable) for all grant-aided capital equipment and otherwise comply with the requirements of the National Procurement Guidelines and to accept only the most economically advantageous tender, save with the prior written consent of Enterprise Ireland and to furnish to Enterprise Ireland on request, details of such quotations or tenders. **Email specifications showing accuracy of the measuring equipment (e.g. electricity meters should have +/- 0.5% accuracy)** **to: green@enterprise-ireland.com**

EU Recovery & Resilience

EU Recovery and Resilience Facility – Information note:
As part of Ireland's National Recovery and Resilience Plan 2021 , funding has been allocated, through the EU's Recovery and Resilience Facility, to support a number of key enterprise objectives i) to Accelerate Decarbonisation of the Enterprise Sector and ii) to drive the Digital Transformation of Enterprise in Ireland.
Projects applied for during the time period 2021-2026 that are in line with these objectives, may be eligible for support under this fund, and entail some additional reporting requirements. These requirements are outlined in the sections below and must be completed for projects to be eligible for support under this fund.
Decarbonisation

Section 1: Beneficial ownership details		
Under REGULATION (EU) 2021/241 establishing the Recovery and Resilience fund, information on beneficial ownership is required of recipients of this funding. The first name(s), last name(s) and date of birth of beneficial owner(s) is required and should be provided in the table below. If no person has a greater than 25% stake in the company, the names & dates of birth of senior managing officials should be given. Information provided in this section on beneficial owners should match the data that has been filed with the central register of beneficial ownership (rbo.gov.ie). .		
First Name	**Second Name**	**Date of birth**
. Add more rows as required. This data will be processed in compliance with the General Data Protection Regulation and retained for a period of 7 years		

Undertakings not required to file with the RBO
Where an undertaking is not required to register with the RBO, there is no requirement to fill in the table above. A short explanation outlining the reason for not being required to register (e.g. listed on regulated market, partnership) should be provided below. (See https://rbo.gov.ie/faq-what-is-a-beneficial-owner.html for further information):

Section 2: Environmental and Do No Significant Harm Compliance
Projects must comply with relevant EU and national environmental legislation and in particular with the **'Do no significant harm' Technical Guidance (2021/C58/01). Specifically the following projects are not eligible:** • activities related to fossil fuels, including downstream use [1] ; • activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks [2] ; • activities related to waste landfills, incinerators [3] and mechanical biological treatment plants [4] ; and • activities where the long-term disposal of waste may cause harm to the environment.
Footnotes: . [1] Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01). . [2] Where the activity supported achieves projected greenhouse gas emissions that are not substantially lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447. . [3] This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for: the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase

of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
. [4] This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants,
where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

Declaration:	
I declare this project will comply with relevant EU and national environmental legislation and the ineligible projects listed above.	

Justification
Please provide a short justification to support the declaration above in respect of the project

Gender Balance

Gender Balance	
As set out in Enterprise Ireland's Women in Business Strategy, enhancing gender balance in Senior Leadership Teams and decision-making roles can help Irish companies to build strong leadership, attract talent and improve performance. [1]	
Including the CEO, how many people are on your senior leadership team [2] ?	
How many of the above identify as women?	
How many directors are on your board?	
(Please only include directors that are actively involved i.e. those who participate in board meetings, have knowledge / oversight of the day-to-day activities of the business etc. Sole traders please insert N/A.)	
How many of the above identify as women?	
Does your company have a documented Diversity & Inclusion Strategy?	

Notes:
. [1] The EI Strategy for Women in Business can be accessed here
. [2] The senior leadership team is defined as the group of individuals at the highest level of management, who set the company's goals and run it day-to-day; it's generally referred to as the "C-Suite". It includes the CEO and the CEO's direct reports."
