Arena Directory
2025

Innovation Arena & AgTech Hub 2025

The Innovation Arena is set to be a central highlight of the National Ploughing Championships 2025, offering a vibrant platform for showcasing the latest breakthroughs in Agri-tech. With strong media interest and thousands of visitors expected, the Arena will spotlight Ireland's leadership in agricultural innovation on a global stage.

What's New for 2025?

Start-Up Pitch Challenge

On opening day, three exceptional start-ups will present their innovations live to a panel of judges and attendees, competing for a €10,000 prize and the coveted title of Start-up Innovator of the Year 2025.

Green Impact Award 2025

Returning for its second year, this award honours solutions that promote sustainability and long-term viability in food and farming.

Innovation Arena Champion 2025

This category is targeted towards established companies with new innovations that have global appeal.

Certificate of Achievement for Innovation

All entries will be reviewed, and those meeting the qualifying criteria will receive a certificate recognizing their contribution to agricultural progress.

Exclusive Preview & Networking for Innovation Arena Applicants – Monday, 15th September

Participants will benefit from a dedicated preview day featuring:

- Access to international buyers and delegates from key markets.
- Consultations with Enterprise Ireland Market Advisors to explore exporting opportunities.
- Networking and pitching session from 3:00 to 5:30 PM.

AgriNet HerdApp

Contact Name: James Taylor

Email: jtaylor@progressivegenetics.ie

Website: www.agrinet.ie

County: Meath

AgriNet HerdApp is the market leading farm management software, designed to manage all the key day-to-day functions on a typical Irish Dairy or beef farm. It allows farmers to make the right management decisions for more profitable farming. Established in 1994, AgriNet has been helping farmers along their journey. AgriNet HerdApp gives you instant access to your herd data, is fully Bord Bia compliant and gets rid of the need of paperwork! AgriNet is owned by farmers. AgriNet is the best value for money management tool available. Start your free 30-day trial today by calling 046 924 9964 or email support@agrinet.ie. Visit www.agrinet.ie to find out more!

Brandon Bioscience

Contact Name: Deirdre Wall

Email: hello@brandonbioscience.com

Website: www.brandonbioscience.com

County: Kerry

We are Brandon Bioscience, a marine biotech company based in Co. Kerry. With operations in Ireland and Scotland, we produce biostimulants derived from marine based biomolecules. Using our PSI® Technology, we fine-tune the bioactivity of our extracts to increase nutrient use efficiency, crop quality and tolerance to abiotic stresses. Founded in 1998, we are proud to pioneer the research of marine based biomolecules and their application as crop based biostimulants. Through peer reviewed publications & trials that provide farmers with reliable performance, we enable them to meet their production, revenue & environmental goals.

Cotter Agritech

Contact Name: Nick Cotter

Email: info@cotteragritech.com

Website: www.cotteragritech.com

County: Limerick

Cotter Agritech was founded by young serial entrepreneur brothers Jack and Nick Cotter in 2019. Based in Abbeyfeale, Co. Limerick, the company's portfolio includes the multi-award-winning Cotter Crate Sheep and Lamb Handler. They also develop software to optimise parasite control in livestock, which is one of the biggest challenges facing the agricultural industry. Their latest innovation is Automated, an automatic dosing gun that integrates with the company's existing SmartWorm automatic parasite detection software, to deliver the highest level of precision medication ever seen in the livestock space. Together these products deliver >70% reduction in medicine usage vs. traditional methods.

EasyFix

Contact Name: Ronan Boyle

Email: ronan.boyle@easyfix.ie

Website: www.easyfix.ie

County: Galway

EASYFIX is a family-owned business established in 1996 that designs, develops and markets a wide range of products for the Agricultural, Equine and Safety industries. All products are designed and developed in-house with a key focus on animal comfort, welfare and performance. Products are exported to over 60 countries worldwide. Key products include Slat Rubber, Cubicle Mattresses, Flexible Cow Cubicles, Rubber Matting for use in Parlors, Feed Lanes, Walkways etc

Equine MediRecord

Contact Name: Finlay Dargan

Email: info@equinemedirecord.com

Website: www.equinemedirecord.com

County: Kildare

Equine Medirecord is setting a new global standard in the management and oversight of equine health and regulatory compliance. Our innovative platform standardizes the recording of comprehensive horse records, including medical histories, drug usage, and induction times, accessible effortlessly via phone or laptop. This advancement ensures that veterinarians can uphold the highest standards of care and compliance, with the ability to capture invoicing, billing, and manage inventory efficiently at the point of service—addressing the industry’s critical challenges.

Lvlogics Limited

Contact Name: Eileen Finnegan

Email: eileen@lvlogics.com

Website: www.lvlogics.com

County: Meath

SiloSpi, developed by Lvlogics is an affordable IoT-connected silo monitoring solution that helps farmers track feed levels in real time via their phone or laptop. With automated email alerts at preset thresholds, farmers (and suppliers) avoid shortages while optimizing feed quality. The system enhances safety by eliminating manual silo inspections and supports sustainability through efficient delivery planning for mills. By providing 24/7 remote monitoring, SiloSpi ensures better feed management, reduced waste, and improved operational efficiency — empowering farmers with smart, data-driven insights.

Micron Agritech

Contact Name: Daniel Izquierdo Hijaz

Email: daniel@micronagritech.com

Website: www.micronagritech.com

County: Dublin

Micron Agritech develops rapid diagnostic technology that enables vets and farmers to test animals on-site for parasites within minutes. Our platform combines these diagnostics with advanced data analytics and resistance monitoring, giving clear insights to support smarter, more sustainable treatment decisions.

MILJO

Contact Name: Aoife Drennan

Email: info@miljo.ie

Website: www.howardfarms.ie

County: Cork

MILJO is innovative nutritional management platform transforming how farmers manage their animals' dietary needs. We create rations that optimise dietary balance while minimising cost and environmental impacts, resulting in overall improved herd performance. MILJO tailors the diet, using data driven algorithms, that will ensure the cow is producing milk to her optimal ability resulting in more efficient and healthier cows. MILJO provides a solution for determining optimal nutrition for herds based on data driven performance targets. The farmer can quickly and easily order balancing rations from favoured suppliers to maximise their herds performance. The Future of Animal Nutrition is now.

Moonsyst

Contact Name: Desmond Savage

Email: desmond.savage@moonsyst.com

Website: www.moonsyst.com

County: Kilkenny

Moonsyst provides a Rumen Bolus IOT Cattle Monitoring Solution for Health, Reproduction and Sustainability. Moonsyst solutions have been deployed in Ireland and 30+ countries around the world.

Precision Microbes

Contact Name: JP Ennis

Email: info@precisionmicrobes.com

Website: www.precisionmicrobes.com

County: Dublin

NATURE WORKING WITH NATURE

Precision Microbes is a microbiology company based in Ireland and specializes in the production of proprietary probiotic products for humans, animal care and plants.

Reap Interactive

Contact Name: Kieran Supple

Email: supple@reapinteractive.com

Website: www.reapinteractive.com

County: Roscommon

Reap Interactive proudly presents BovinePlus, our pioneering precision livestock performance management system. Launched in 2019 in Ireland, BovinePlus revolutionizes farming by tracking each animal individually, eliminating reliance on herd averages. This cutting-edge technology provides real-time data on weight, health, and water intake, optimizing profitability by pinpointing underperforming animals, determining the ideal slaughter timings, and enhancing feed efficiency. Early health issue detection and verified data trails boost both animal welfare and operational transparency. With BovinePlus, farmers gain unparalleled insights, boosting profitability and sustainable in livestock management.

RT Sales Limited

Contact Name: Pdraig Teahan

Email: info@rthedgecutting.com

Website: www.rthedgecutters.com

County: Kerry

RT Sales Ltd is a family-run business dedicated to innovation, quality, and long-term partnerships. As proud manufacturers of the RT ProArm hedgecutters, winner of Machine of the Year at NPC 2024, the company has earned industry recognition for engineering excellence and reliability. RT Sales Ltd blends decades of expertise with a customer-focused approach, delivering hedgecutters made for contractors by contractors. Built on family values, innovation, and proud of being Irish made, RT Sales Ltd thrives by combining tradition with patented cutting-edge engineering solutions.

Terra NutriTECH

Contact Name: Pdraig Hennes

Email: padraig@terranutritech.com

Website: www.terranutritech.com

County: Kildare

Terra Nutritech is an innovative Agri-Tech company specializing in precision liquid mineral supplementation for livestock. Founded in Ireland, the company leverages advanced technology to deliver automated, customized mineral solutions directly to animal water systems. This ensures optimal health and productivity by addressing specific deficiencies and nutritional needs in real-time. Terra Nutritech's systems are designed to enhance farm efficiency, reduce labour, and improve animal well-being, leading to better overall farm performance. Committed to sustainability, the company also focuses on minimizing environmental impact through precise dosing and reduced waste, making them a leader in modern livestock nutrition.

Innovation Arena

Autocoupler

Contact Name: Seamus Kenny

Email: agrinet1@gmail.com

Website: N/A

County: Kilkenny

Autocoupler is a start-up device manufacturing project. Based in Johnstown Co Kilkenny. One man aims to revolutionise the hydraulic attachment industry. Entry in enterprise Ireland's innovations arena 2024. Moving the evolution of machinery in the Agri/ construction industry forward by automating the quick attach system on loaders connecting implements by improving efficiency and safety at the push of a button.

Beotanics Ltd

Contact Name: Mark O'Brien

Email: markobrien@beotancis.com

Website: www.beotanics.com

County: Kilkenny

Providing the food and beverage industry with access to a sustainable supply of unique plant varieties, high in nutritional and functional values.

Biocel Ltd

Contact Name: Vincent Kelly

Email: vincent.kelly@biocel.ie

Website: www.biocel.ie

County: Cork

Biocel Ltd, based in Little Island, Cork. Founded in 1966 by the late Dr Karl McCarthy primarily to supply the Agri & Food Sector with speciality hygiene, & disinfection products. Biocel Ltd is a family-owned business now in its 3rd generation, having grown over the years to a key supplier to the Agri & Food Sectors.

Boland Builders LTD

Contact Name: George Boland

Email: lizboland@live.ie

Website: N/A

County: Kildare

Boland Builders Ltd commenced trading in 1994 as a plastering and building company and successfully traded around Dublin and Kildare for several years. In more recent years it has pivoted into developing innovative windmills.

Boland Builders is dedicated to rethinking wind power from the ground up. We design and develop innovative wind turbines that overcome the limitations of traditional models, making renewable energy safer, more adaptable, and more efficient.

Our designs are built around simplicity and resilience. With moving parts shielded from external access, our turbines reduce maintenance risks and increase durability. Their flexible form factors allow safe installation in urban environments, while even large-scale systems can be compactly packed and transported for rapid deployment in remote locations.

At Boland Builders, we believe wind energy should fit seamlessly into modern life — powering cities, communities, and industries with technology that is smarter, safer, and designed for the future.

BT-BroTech

Contact Name: Robert Beattie

Email: rob@sheepguardian.com

Website: www.sheepguardian.com

County: Cavan

At BT-BroTech, we know farmers need simple, reliable flock protection—that's why we built the Sheep Guardian. With just one GPS-enabled collar on a single sheep within the flock, our AI-driven system detects dog attacks and abnormal behaviours, monitors movements within your custom geofence, and delivers instant alerts straight to your phone. All data is processed in the cloud and served up in our intuitive mobile app, so you spend less time checking on sheep and more time running your farm. Sheep Guardian makes keeping your flock safe smarter, faster, and worry-free—because your livelihood depends on it.

Bua Terra Limited

Contact Name: Declan Molloy

Email: info@buaterra.com

Website: www.buaterra.com

County: Mayo

Bua Terra is an Irish agritech startup developing smart, practical tools that make farming safer and more efficient. Our first product, Jolt, is a compact electric fence voltage tester that fits on a keyring—giving farmers a quick, affordable way to check fence performance on the go. With farm safety under increasing focus, Jolt helps prevent livestock escapes and accidental shocks, supporting compliance and peace of mind. Designed for daily use and customisable for agribusinesses, Jolt combines innovation, safety, and simplicity in one powerful tool. Visit our stand to see it in action.

Censortec

Contact Name: Sean Crowley

Email: sean@censortec.com

Website: www.censortec.com

County: Kerry

SmartSight – Locomotion Monitoring; is an AI-driven innovation that uses computer vision technology to detect lameness accurately and early in dairy cows. This innovation marks the first step in unlocking the massive possibilities for using AI generated Vision Technology on dairy farms. Censortec as a leading supplier of Nedap Heat and Health monitoring systems are delighted to be launching this ground-breaking innovation and to be adding even more technology powered by Nedap to our existing portfolio.

Climeaction

Contact Name: Paul Murphy

Email: pmurphy@climeaction.com

Website: www.climeaction.com

County: Cork

CLIMEACTION

Climeaction, a global leader in industrial climate solutions, partners with some of the world's largest manufacturers to deliver measurable emissions reductions. Drawing on this experience, we created VSAg – a groundbreaking tech platform that connects manufacturers with their agricultural supply chains to cut emissions, strengthen relationships, and unlock premium value for sustainable produce. Launching at the National Ploughing Championships 2025, VSAg is set to transform how the agri-food sector collaborates for climate and commercial gains.

Core Technology

Contact Name: Nicola Cogan

Email: nicola.cogan@coretechnology.ie

Website: www.coretechnology.ie

County: Cork

CORETech: ERP software that powers agribusiness | 40+ years of innovation in dairy, grain, milling & retail

Technology. Transformation. Trust.

CORETech is an Irish solution provider with over four decades of industry expertise. We deliver scalable ERP solutions tailored to agri co-operatives, feed mills, dairy processors & agri-retailers. Our software transforms single or multi-site operations. Success is built on strong partnerships, continuous innovation, and a clear focus on client growth. Whether streamlining operations, enhancing supply chains, improving member services, or unlocking insights through data, CORETech delivers software that works, because we understand how your business works.

Cormac Tagging

Contact Name: Ursula Kelly

Email: ursula@cormactagging.ie

Website: www.cormactagging.ie

County: Galway

Cormac Tagging is an Irish leader in animal identification. The company is trusted by farmers across Ireland and is now scaling internationally. Built on decades of experience, the company combines proven reliability with a strong focus on technology and innovation. From the Irish roll out of the National Genotyping Scheme and both national herds now identified electronically Cormac Tagging is using its experience within the Irish market to develop the future of livestock traceability and data driven farming.

Collaboration is central to its growth, working closely with farmers, industry partners, and other stakeholders to fully utilise animal identification products that improve accuracy, efficiency, and sustainability. With a firm commitment to innovation and collaboration, Cormac Tagging's ambition is to play a vital role to shape smarter and improved connected solutions for animal identification worldwide.

De Energy Hub

Contact Name: David Horgan

Email: greenforgeresearch@gmail.com

Website: www.deenergyhub.ie

County: Dublin

Our EV charger and parking app is your ultimate solution for hassle-free electric vehicle ownership. Discover available charging stations and reserve parking spots with ease, all in one intuitive platform. Say goodbye to range anxiety and parking stress. Download now to power up your journey and find your perfect spot, every time.

More chargers. More choices. More power to you.

Dezzi Inc

Contact Name: Amy West

Email: awymest@gmail.com

Website: www.dezzi.farm

County: Galway

DEZZI Inc.

Dezzi is a privacy-first AI operating system built for farms, running entirely on local, modular hardware. It helps farmers turn daily knowledge into actionable insights—streamlining compliance, unlocking funding, and surfacing real-time market opportunities—without sending data to the cloud. Farmers chat with Dezzi through a friendly app, gradually building a digital model of their farm that powers task-specific AI agents.

Forest Living

Contact Name: Conor Fay

Email: hello@forestliving.ie

Website: www.forestliving.ie

County: Kildare

We transform locally sourced sawdust from joineries and kitchen manufacturers, which is traditionally treated as waste, into beautifully crafted, carbon-storing homewares, specifically tea light holders and coasters. For eco-conscious consumers, we offer meaningful, sustainable gifts and homewares that tell a story of circular design. For businesses, we provide custom-etched, branded gifts that showcase corporate values, reduce environmental impact, and turn everyday items into climate-positive statements.

Future Agritech

Contact Name: Walter Hegarty

Email: walterhegarty@futureagritech.com

Website: www.futureagritech.com

County: Donegal

Future Agritech's Automated Hoof Spray System offers a solution to dairy cow lameness by reducing the count of bacteria contributing to their lameness (Mortellaro, White Line Disease, Hoof Ulcers) by 27%, uses 50% of water and 50% of treatment chemical. The system automatically sprays clean freshly prepared treatment solution to both front and rear hooves of every animal, while significantly reducing the handling of hazardous treatment chemicals. The system is suitable for standard, rotary and robotic milking operations.

Genocells

Contact Name: Denise Jones

Email: djones@munsterbovine.ie

Websites: www.munsterbovine.ie /
www.progressivegenetics.ie / www.icbf.com

County: Cork

In April 2025, Munster Bovine and Progressive Genetics in association with ICBF launched the ground-breaking Genocells technology exclusively to the Irish market. Genocells allows dairy farmers to determine individual cow somatic cell counts using a single bulk tank milk sample. The National Genotyping Programme (NGP) introduced by ICBF in 2023 has provided a natural pathway for the rollout of this new service to Irish dairy farmers. Genotypes provide a record of the individual cow's DNA. Somatic cells in milk contain the DNA of the individual cow. Bulk Tank milk contains somatic cells from every cow that contributes milk to the tank. Genocells identifies the somatic cells that originate from each cow by finding the cow's unique genotype and assigns a 'cellular responsibility' to each cow as a % contribution to the overall somatic cell DNA volume. Genocells is now available to Munster Bovine and Progressive Genetics milk recording customers whose herds are genotyped.

Glasport Bio

Contact Name: Connor Morrison

Email: conor@glasportbio.com

Website: www.glasportbio.com

County: Galway

Glasport Bio is a Galway-based biotechnology company pioneering solutions to reduce agricultural greenhouse gas emissions. Our flagship product, GasAbate, a manure management additive, has demonstrated over an 80% reduction in methane emissions, while enhancing nutrient retention and biogas yield. GasAbate is scientifically validated, patented, safe and environmentally friendly. GasAbate reduces the need for slurry agitation by preventing gas build up during storage and also helps remove nuisance odors leading to a better farming environment for everyone. At GlasPort Bio our technologies empower farmers to meet environmental targets, enhance productivity, and contribute to climate action.

Herdwatch

Contact Name: James Greevy

Email: james@herdwatch.com

Website: www.herdwatch.com

County: Tipperary

Herdwatch is a leading farm management software platform that helps farmers simplify compliance, improve efficiency, and run more sustainable businesses. Trusted by over 20,000 farmers across Ireland, the UK, and beyond, Herdwatch replaces paperwork with easy-to-use digital tools for recording animal movements, breeding, medicine usage, and farm tasks. The platform connects seamlessly with national databases, processors, and industry partners, giving farmers greater control of their data while enabling supply chain transparency. With solutions for dairy, beef, and mixed enterprises, Herdwatch empowers everyday farmers to save time, reduce costs, and make better decisions, all from their phone or computer.

Hibra Design

Contact Name: Michael Keane

Email: mike@hibra.ie

Website: N/A

County: Cork

HIBRA DESIGN

Hibra Design is a Cork-based specialist automotive engineering development company. We are unique in the Irish market as the company provides its clients with a full spectrum of vehicle engineering services; from full ground-up, bespoke vehicle development, through to the re-engineering of existing vehicles with clean-technology powertrain systems.

Intellync

Contact Name: Philip Murphy

Email: philip.murphy@intellync.com

Website: www.feedlync.com

County: Kilkenny

Feedlync is a cloud-based feed management system designed to be intuitive, accurate, and farmer-friendly. It provides real-time insights into feed intake, efficiency, and cost, helping farmers improve cow performance, reduce waste, and lower carbon footprints. The app works with any mixer-wagon brand via a versatile weighing system, giving farmers control anytime, anywhere. Feedlync simplifies daily feeding, boosts accuracy, and delivers powerful data for smarter decisions. Whether for small dairies or large-scale operations, it supports efficiency and profitability. Trusted by over 1,500 farmers worldwide, Feedlync is transforming livestock feeding through technology and practical on-farm functionality.

Pearson Milking Technology

Contact Name: Ross Pearson

Email: ross.pearson@pearsonmilking.com

Website: pearsonmilking.com

County: Kildare

Founded in 1948, Pearson Milking Technology is a proud third-generation family business with over 75 years of experience in the dairy industry.

From our headquarters in Athy, Co. Kildare, we design and manufacture advanced milking parlours and herd management solutions that combine tradition with innovation. Today, Pearson exports to over 20 countries worldwide, supporting farmers with reliable, high-performance technology that prioritises cow comfort, efficiency, and long-term value. With a heritage built on trust and a future driven by smart dairy solutions, Pearson remains "The Smart Dairy Choice" for modern farmer's.

Precision Drone Spray

Contact Name: Neil McKeever

Email: info@precisiondronespray.ie

Website: www.precisiondronespray.ie

County: Meath

Precision Drone Spray is Ireland's only authorised reseller and service provider for DJI agricultural spray drones. We supply, train, and support farmers, contractors, and land managers with cutting-edge drone solutions for crop care, seeding, and environmental management. Leveraging AI-driven mapping and precision application technology, we help optimise yields, reduce waste, and protect the environment. From sales and spare parts to expert training and operational authorisation guidance, we deliver end-to-end service to help customers work smarter, safer, and more sustainably.

ScanInsights

Contact Name: Dr. Dan Ryan

Email: info@scaninsights.org

Website: www.scaninsights.org

County: Cork

The ScanInsights App makes scanning faster and more accurate. ScanInsights unites animal welfare, farmer prosperity and environmental responsibility. Combining a data base of 3 million scans, decades of expertise in bovine physiology with advanced AI, ScanInsights transforms real time scans into actionable insights – from pregnancy ageing to oestrus stages and foetal gender. By empowering the user to make faster and more accurate decisions, ScanInsights helps herds go in calf earlier, transition smoother and thrive through more lactations. The result: higher fertility, reduced intervention and lower methane emissions. Our mission is: healthy cows, profitable farms and a healthier planet.

SM Advanced Technologies LTD

Contact Name: Máirtín Gannon

Email: mairtin@g-es.ie

Website: N/A

County: Kilkenny

SM Advanced Technologies LTD. is a dynamic startup blending software innovation with advanced mechanical expertise. Our aim is to combine engineering precision with creative technology to develop cutting-edge solutions that drive progress across a diverse range of industries.

Spreadpoint

Contact Name: Niall Tiernan

Email: niall.tiernan@spreadpoint.co.uk

Website: www.spreadpoint.co.uk

County: Down

Smart Solutions for Real-World Challenges

At SpreadPoint, we don't just make equipment, we create solutions. Our innovative approach transforms age old tasks in agriculture, amenity, and construction into easier, faster, and more efficient operations. With decades of engineering expertise and a drive to think beyond limits, we build machines that deliver unmatched durability and performance in the field. Our product range is designed to meet the diverse needs of today's operators, offering practical solutions that consistently deliver results. Whatever the challenge, SpreadPoint has the answer, helping you work smarter, not harder.

SRF LTD

Contact Name: Patrick Donnelly

Email: patrick@slurryquip.com

Website: www.slurryquip.com

County: Down

Slurryquip is a leading manufacturer of slurry management solutions, serving farmers and contractors since 1994. Based in Downpatrick, Northern Ireland, our team of 40 specialties in the design, engineering, and build of high-quality slurry spreading equipment. Committed to continuous innovation, we develop technology that meets the evolving needs of modern agriculture. With a focus on efficiency, reliability, and practical design, Slurryquip has become the trusted choice for farmers and contractors seeking effective slurry management systems.

VetPal

Contact Name: Alan Gormley

Email: info@vetpal.ie

Website: <https://vetpal.ie/>

County: Roscommon

VetPal – An Innovative Tech Platform Connecting Vets, Farmers, Local Remedy Stores & Co-Ops VetPal is Europe's first fully integrated digital veterinary platform, connecting vets, farmers, local remedy stores, and co-ops in one seamless, compliant system. Created by a vet with farming experience, VetPal blends innovation and practicality to streamline e-prescriptions, enhance communication, and meet evolving EU regulations. Integrated with Ireland's National Veterinary Prescription System, it enables secure prescription transfer between vets and dispensers, ensuring EU and national compliance while streamlining access to essential treatments and improving efficiency. Focused on growth, innovation, and strong industry partnerships, VetPal is shaping the future of digital compliance in agriculture across Ireland and Europe.

Industry Supports

ACORNS

Contact Name: Paula Fitzsimons

Email: paula@acorns.ie

Website: www.acorns.ie

County: Dublin

ACORNS was designed to unleash the potential of early-stage female entrepreneurs living in rural Ireland. The objective is to equip these with the appropriate knowledge, confidence, and networks to successfully start and develop sustainable businesses. Based on a belief that entrepreneurs learn best from each other, ACORNS is focused on interactive round table sessions that are facilitated by successful female entrepreneurs who have started and successfully grown businesses in rural Ireland. Those interested in participating in the 11th cycle can register their interest at www.acorns.ie and they will be sent an application form. The initiative has been selected to represent Ireland at the 2025 European Enterprise Promotion Awards, Investing in Entrepreneurial Skills. Thanks to funding from the Department of Agriculture, Food and the Marine, there will be no charge for those selected to participate in ACORNS.

AgriTech Ireland

Oifig Maoine Intleachtúla na hÉire
Intellectual Property Office of Ireland

The Intellectual Property Office of Ireland is the state agency responsible for the administration and protection of Intellectual Property (IP) rights in Ireland. IP refers to the creations of the mind, such as inventions (Patents); literary and artistic works (Copyright); new product designs (Industrial Designs); brand-names, symbols, or logos (Trademarks). We have a dedicated information centre with experienced staff who are happy to assist with your queries over the phone, via email or in person. We offer 24/7 services on our website www.ipoi.gov.ie, including information on the importance of IP for your business, explaining the application process and associated costs.
