

## Harnessing The Power Of Genomics

Albert Theatre, RCSI, Dublin – Wednesday Dec. 13<sup>th</sup>, 2017  
2:30 – 5pm

Genomics is the study of genes and their interactions and functions. It has the potential to radically transform disease understanding, diagnosis and treatment. However, harnessing this potential raises a number of ethical, legal and social issues. This event will help inform clinicians, researchers (both in academic and industry) and the Irish Life Science community on the significant opportunities, potential pitfalls and international practices in this field.
