

IRELAND'S CHAMPIONS OF EU RESEARCH

Excellent science, industrial leadership and tackling societal challenges

As leaders of major projects in the European Research and Innovation Programme - Horizon 2020 - the researchers from academic institutions and companies in Ireland listed below are deemed to have reached the pinnacle of the European research system.

Tackling societal challenges and enabling enterprise development, they are living proof of the world-class research that is ongoing in Ireland and testament to the robust research infrastructure that has been built in Ireland over recent years.

Their achievements were recognised at Ireland's Champions of EU Research Forum in Dublin on 28 June 2017 which was attended by John Halligan TD, Minister of State for Training, Skills, Innovation, Research and Development and Julie Sinnamon, CEO Enterprise Ireland. The event was hosted by Enterprise Ireland on behalf of Ireland's National Support Network for Horizon 2020.
