

CLEANTECH SECTOR

The global drive to innovatively and competitively manage climate change, grow sustainably, generate clean energy and manage scarce natural resources is creating rapid growth in the demand for CleanTech products and services worldwide.

Recent green stimulus packages across the world's major economies and green public procurement targets within the EU have stimulated further growth. Venture capital investment in the CleanTech sector worldwide continues to grow apace, and CleanTech is currently the third largest recipient of venture capital funds in the United States.

Ireland is uniquely positioned to avail of the opportunities that global CleanTech markets present with excellent natural resources in the

form of renewable energy sources (wind, wave, tidal), well developed research infrastructure, and a solid skills base. At present, CleanTech is among Ireland's fastest growing sectors, with Ireland's 240 CleanTech companies employing over 5,900 people.

Enterprise Ireland is committed to continuing to invest in developing the capabilities of the domestic CleanTech sector with the aim of becoming a world leader in several niche sub-sectors within the next five years.

IRELAND

Ireland enters the second decade of the 21st century as a country transformed into a dynamic, innovative and open economy where exports account for more than 80% of GNP. Therefore, Ireland's business people are experienced and skilled at meeting and exceeding the needs of their international customers.

While retaining strengths in traditional industries like agri-business and sub-supply, Irish companies are now successfully exporting products and services in sectors such as CleanTech and green technology, life sciences, software and telecoms, and financial and education services.

Ireland has an excellent skills base, a first-class education system, a thriving R&D sector, and a track record of bringing innovative products and services to market quickly. As a result, Irish companies are smart, flexible and have the capability to compete internationally.

Ireland is one of the most favoured European destinations for foreign direct investment and, at 12.5%, has the lowest corporate tax rate in the EU. Ireland also provides a tax credit of 25% of capital and revenue spend on qualifying R&D.

ENTERPRISE IRELAND

Enterprise Ireland is the government organisation responsible for the development of Irish enterprise and has a strong track record in assisting Irish businesses to start, grow, innovate and internationalise.

With a network of offices covering more than 60 markets across the globe, we have developed a vibrant network of contacts, detailed knowledge and a keen understanding of local markets and cultures. We can help you connect with and maintain profitable partnerships with businesses in Ireland.
