

CONSUMER RETAIL MARKETS

Most companies in the sector are long-established, family-owned and managed. In an increasingly competitive environment, they have had the management capability and commitment to successfully adapt their business model. They have invested in marketing, product

development, design, logistics and IT. While retaining their traditional manufacturing skills they have become increasingly knowledge intensive, flexible and digitally driven. Their success is highlighted by the fact that today the majority of their sales come from overseas markets.

SUB-SECTORS

APPAREL

The Apparel area is made up of a number of sub sectors including Fashion, Childrenswear, Sportswear, Footwear, Uniforms, Corporate wear, Accessories and Knitwear. The industry in Ireland continues to change its business model from one that was historically based purely on manufacturing to one that is now increasingly led by knowledge, design and innovation. Successful companies within the sector have a strong focus on their end consumer and also on diversifying their channels to market including selling on-line.

CONSUMER PRODUCTS

The consumer products manufacturing sector is focused on home-wares and leisure activities in global retail markets. Innovation in products for washing machines and horseware have delivered world leading brands but companies are also delivering proprietary decorative, functional, promotional and publishing solutions for retail markets in Ireland and abroad.

FURNITURE

The furniture manufacturing sector in Ireland represents a broad range of companies in terms of size, scale and product. The main sub-sectors include Cabinet, Bedding, Upholstery, Kitchen, Office and Hotel furniture.

The industry continues to respond to rapidly changing markets and channels with on-going investment in research to understand customer needs, excellence in design and product development and maintaining competitiveness through automation and flexible production processes.

GIFTWARE & JEWELLERY

The giftware and jewellery sector is a long established and export oriented component of Irish manufacturing industry. Innovative table top, ceramic, glass crystal and jewellery products are made for consumers in mainstream and ethnic markets. The sector includes companies with global reach, proprietary skills and design capabilities located throughout Ireland.

TEXTILES

Irish Textiles have been long recognised Internationally. The sector offers a wide spectrum of products from Tweed for clothing to Upholstery for Airline seats. With a focus on export markets, companies are very responsive to clients needs in terms of innovative products and service.

Ireland

Ireland enters the second decade of the 21st century as a country transformed into a dynamic, innovative and open economy where exports account for more than 80% of GNP. Therefore, Ireland's business people are experienced and skilled at meeting and exceeding the needs of their international customers.

While retaining strengths in traditional industries like agri-business and sub-supply, Irish companies are now successfully exporting products and services in sectors such as cleantech and green technology, lifesciences, software and telecoms, and financial and education services.

Ireland has an excellent skills base, a first-class education system, a thriving R&D sector, and a track record of bringing innovative products and services to market quickly. As a result, Irish companies are smart, flexible and have the capability to compete Internationally.

Ireland is one of the most favoured European destinations for foreign direct investment and, at 12.5%, has the lowest corporate tax rate in the EU. Ireland also provides a tax credit of 25% of capital and revenue spend on qualifying R&D.

Enterprise Ireland

Enterprise Ireland is the government organisation responsible for the development of Irish enterprise and has a strong track record in assisting Irish businesses to start, grow, innovate and internationalise.

With a network of offices covering more than 60 markets across the globe, we have developed a vibrant network of contacts, detailed knowledge and a keen understanding of local markets and cultures.

We can help you connect with and maintain profitable partnerships with businesses in Ireland.
